Subject: RCD - still installing and/or selling?

adam: please confirm with your client whether they are still installing and/or selling the parts that epa has inquired about. if the answer is yes, please let them know that epa expects them to stop immediately. your client's delays in responding have held up issuance of its fov, but epa considers it to be in violation. "knowing" or "willful" violations are subject to higher enforcement response, and our wish is that your client avoid such.

regards -andre
